DETAILED ACTION***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishizawa (5,883,406) in view of Hayashi, Wen, Rodgers and Saitoh. The explanation of the Hayashi, Wen, Rodgers and Saitoh references is incorporated by reference from the previous actions. Newly cited reference to Nishizawa shows a structure, for example in FIG. 14, where regions (214) may be considered as floating gate regions (col. 15, l. 47-60) and regions (213) as buried bit lines. This structure would meet the limitations of claim 1 with a floating gate formed in the substrate in proximity to a buried bit line which is completely buried in and completely surrounded by the substrate. This buried bit line can also be considered to be formed at the side of the floating gate.

Taken together, the references show all of the features of the rejected claims, and one skilled in the art would be motivated to combine them in order to achieve superior device characteristics.

Allowable Subject Matter

Claims 15-21, 23 and 24 are allowed.
